## cork and sustainability

**A sustainable raw material** – cork comes from the bark of the cork oak, a slowly growing tree from the Mediterranean Basin that lives on average 200 years.

**An activity that crosses generations** – on average, cork oaks are manually harvested for the first time when the tree is 25 years old and then in 9 year-cycles.

**Truly environmental-friendly** – harvesting cork is remarkably sustainable, a process that doesn't damage the tree. The bark naturally regenerates after each harvest.

**Positive economic and social impact** – cork harvesting is the best paid agricultural work in the world, contributing to the sustainability of the rural areas in the Mediterranean region.

**Positive ecological impact** – cork oak forests have an absorption capacity of up to 32 million tons of CO<sub>2</sub> per year.

## corktech from nature, to your special space

Technology only makes sense if it improves people's lives. This concept finds expression in products developed with Corktech technology. By using a unique engineered multilayer structure, which combines state of the art technology with the exclusive natural properties of cork, a higher standard in flooring is achieved, providing the perfect match between design and wellbeing.

Wicanders uniqueness is daily achieved by continuous research on how end customers think and live their spaces. Wicanders brings to the market products that provide a silent and thermally insulated environment, that endures through time and are sustainable at the same time.

+ natural thermal insulation

- > Best energy efficiency
- > Optimal temperature all year round

+ silence

- > Reduces the walking sound up to 53%
- > Peaceful and quiet environment

+ walking comfort

- > Decreases tensions and fatigue
- > Reduces effort on walking

+ impact resistant

- > Shock absorbing
- > Increased life span

## hydracork

Hydrocork is a low thickness floating solution 100% waterproof, which means it can be installed in all areas, including kitchens and bathrooms. The PressFit compression system makes it very easy to install, functioning like a cork stopper.

The elasticity and resilience of Hydrocork's cork layer creates a floor that is adaptable to pressure, with the ability to resist and recover from impacts. The surface incorporates a protective wear layer, making it easy to clean.

Available in 27 natural wood looks and 6 realistic stone visuals, Hydrocork provides a remarkable enduring beauty, ready for real life.
